The shaded handicap is the lower of the two numbers and will be used for the next tournament

** For each player with 6 scores, the Tournament Handicap is the average of the two lowest differential values in the list. Scores are the adjusted scores from the player's last 6 DGC sanctioned tournaments, and the differentials are calculated from the formula: Differential = (Adjusted Gross Score - 63.4 * 113 / 105 with 113 being the average slope of all courses, 105 being the DGC slope, and 63.4 being the DGC par rating.

2 - Indicates that there were less than 6 scores so the lowest differential was used for the Tourney HDCP.

3 - Indicates that there were less than 2 scores so the Tourney HDCP is 90% of the GHIN HDCP.

4 - Indicates that player's handicap is frozen.

The shaded handicap is the lower of the two numbers and will be used for the next tournament

** For each player with 6 scores, the Tournament Handicap is the average of the two lowest differential values in the list. Scores are the adjusted scores from the player's last 6 DGC sanctioned tournaments, and the differentials are calculated from the formula: Differential = (Adjusted Gross Score - 63.4 * 113 / 105 with 113 being the average slope of all courses, 105 being the DGC slope, and 63.4 being the DGC par rating.

2 - Indicates that there were less than 6 scores so the lowest differential was used for the Tourney HDCP.

3 - Indicates that there were less than 2 scores so the Tourney HDCP is 90% of the GHIN HDCP.

4 - Indicates that player's handicap is frozen.

Tournament Scores, Differentials and Tournament Handicap
